SHPE Charity Golf Tournament Recap

This past June 6th, the chapter had its 3rd annual scholarship golf tournament. Held at Cross Timber golf course in Azle, we had great turnout with over 50 golfers and 7 volunteers participating.

The goal of this annual tournament is to raise money that will be used to provide college scholarship funding for high school students who are planning to major in Science, Engineering, Math, or Technology (STEM). After the event, the chapter is confident it has met its 2014 goal of raising funds for six \$1,000 scholarships. Thank you to everyone who contributed!

Trimble Tech High School SHPE Jr.

The SHPE at Trimble Tech HS Junior chapter recently held their final End of the Year celebration party and mentoring meeting on Friday, May 30th. During the last meeting, the seniors presented their farewell messages and the new executive board officers were presented to the members. Pizza, refreshments, and snacks were provided and finalized our exciting meeting with an exciting rocket launch that the organization had assembled throughout the semester during SHPE Jr meetings.

The chapter would like to thank our own Lorena Loucel for all her hard work this past year, and congratulations to the 18 graduating Trimble Tech SHPE Jr. Seniors. Best of luck to them and the bright future that is ahead of them!

Please contact [Lorena Loucel](#) if you are interested in participating in SHPE Jr. at Trimble Tech High next academic year.

Trinity High School SHPE Jr.

The SHPE Jr chapter at Trinity High School recently held their final mentoring session and End of the Year celebration party this past May 23rd. During the last meeting, the students learned about future job opportunities with Lockheed Martin and the F-35 Program. The students also received awards and F-35 lanyards, in addition to bidding farewell to the graduating seniors.

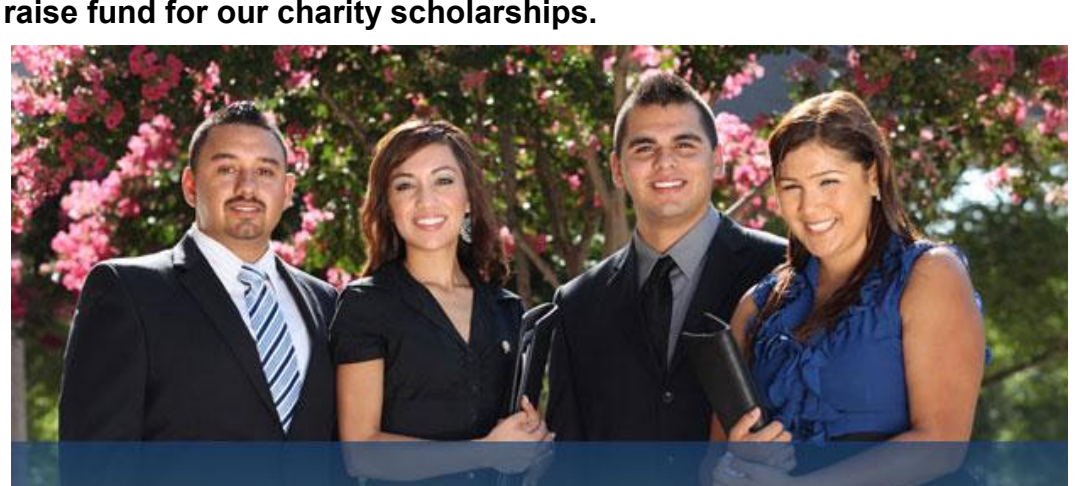

Reflecting on the past year, the Trinity SHPE Jr. Club learned about FAFSA, the college application process, resume writing techniques, job interviewing skills, scholarships, summer programs/internship opportunities, and how to solve real-world science and engineering problems. There were represented at the Region 5 SHPE Conference held at UT Arlington, and in collaboration with SHPE Lockheed Martin Aeronautics hosted a Noche de Ciencias bilingual parent-student workshop this past October.

The chapter would like to thank the Trinity school advisor, Sra. Monica Ubillus, and our own James Narey for all his hard work this past year. Finally, congratulations to all of the 2014 graduating Trinity SHPE Jr. seniors, and best of luck to them in all their future endeavors!

Please contact [James Narey](#) if you are interested in participating in SHPE Jr. at Trinity High School next academic year.

SHPE Membership Renewal

SHPE familia, don't forget that the SHPE year 2013/2014 has now come to an end and it is time to once again renew annual membership. Membership and dues are extremely important as it allows the chapter to host more activities, sponsor more individuals for conferences, and raise fund for our charity scholarships.

Please click [HERE](#) to renew your membership today!

Vital Link Mentors Needed

Community Relations still needs six additional mentors to work with middle school students who will be in plant June 23-27. Specifically, mentors are needed who will work with two students each and allow them to job shadow them while they work and engage them in meaningful work activities while discussing the types of knowledge that's needed to do their jobs. The students will be with here from 8:30 am to 11:30 am each morning.

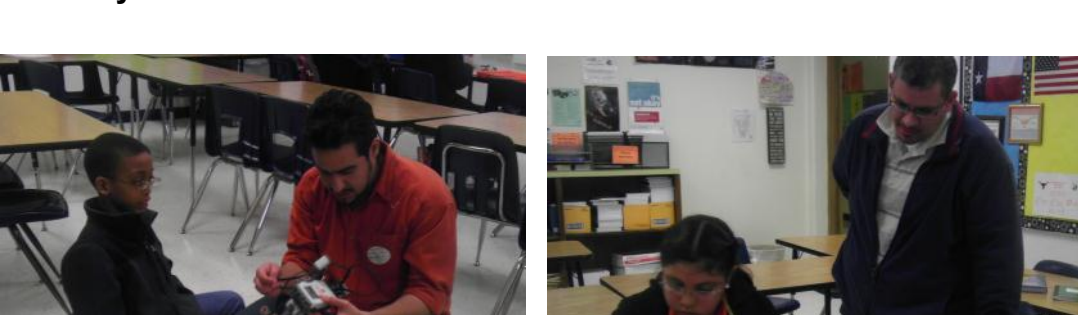

For more information please read the LM Aero Vital Link Mentor Guidelines [HERE](#) or contact

[Norman Robbins](#).

SHPE Lego Lab

The SHPE Lego Lab at Leonard Middle School has finished for the 2013-2014 school year. The final session took place on May 21st where the kids were treated to a pizza party and a movie. During the Lego Lab, the students worked with Lego Mindstorms kits to build robots and get hands on experience with engineering. The Lego Mindstorm kits also allowed the students to program their robots (via Labview) to do various tasks and get exposure to another type of engineering discipline. This lab usually takes place for one hour every Wednesday as an afterschool program offered during the academic school year.

Please contact [Joksan Holguin](#) if you are interested in participating in SHPE Lego Lab at Leonard Middle School next academic year.

SHPE Newsletter Inputs

SHPE Familia,

If you have any input or events that you would like to see in our newsletter contact our director of communications [Aaron Prokopchuk](#).
